

Specifications

Valve Size: DN8 - DN50 (1/4"-2")

Valve material: PVC, Stainless steel, Brass

Control mode: Wired (2 wires, 3 wires, 5 wires, signal feedback customizable), wireless (Lora, Lorawan)

Power supply voltage: DC3-6V, ADC9-35V, AC110-230V

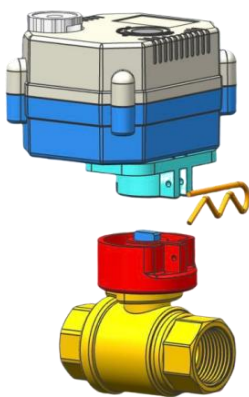

Applications

Water supply and drainage system, smart home, water treatment systems, irrigation system, fire fighting system, recreational vehicle (RV), trailer home, sprinkler truck, HVAC system etc., where automatic remote fluid control is needed.

Features

- Precision metal gear, high strength, reliable performance, long service life
- Multiple wiring for various system; valve status feedback available for intelligent control unit
- Low power consumption, battery workable
- Compact design workable for small equipment
- Position indicator and manual override available
- Various connectors customizable

Customization

Quick-assembly design

✘ With adapters mounted to the actuator and valve, the valve and actuator can be assembled and disassembled **within 3s**, which makes:

- installation and repairing much easier;
- tremendous reduction in inventory.

Connectors customizable

✘ Various connectors customizable to fit into different control systems and meet requirement of different scenarios.

For other customization, talk to us.
